

1. Airl Radio provides commercial free listening of music that is uplifting and without the fear of vulgar, obscene, or profane language.

2. If a LPFM broadcaster was allowed to displace the Airl translator then my community would lose a source of family oriented programing. The local translator was recently upgraded to allow a the whole Lexington community to receive this station. Because of this the knowledge of what would be lost is fresh in my mind. Our communtiy would be made smaller if LPFM were allowed to supercede existing FM translator broadcasts.

3. Because Airl is funded by the public interest it is focused on providing the service that the public desires. I contribute to keep the Airl and its sister network KLOVE operating because of the positive attitude it's programming presents to the community. Even though I am in my 50's, this music is geared toward the 15-30 yrs group and I support this because it is this age group that sorely needs a positive message in the world today.
